

The Right Word

Proverbs 10.23 and 15.23

'Good people know the right thing to say'

'It can be a great joy to find just the right word for a situation'

When you are poorly and go to the Doctors, if needed, your Doctor thinks very carefully and with great consideration about the correct medicine to help you get better.

For example if you went to your Doctors with an eye infection and he had lots of different medicines written on paper in a bowl, and then he just plucked one out at random and wrote you a prescription for the chosen medicine.

1. What would you think?

2. What could happen?

Just as a Doctor chooses medicines carefully, it is important that words are chosen correctly. The right word can heal, like a medicine.

3. Look at each face. What does each face express?

4. Focus on one of the faces and create a short story/ few sentences that

detail how they have come to show the expression on their face.

For example the boy is upset because he is being bullied at school; I would tell him that everything is going to be alright. That I am going to help him.
