

Dear parents and carers,

## **Re: Nut and peanut allergy**

Nut and peanut allergies can cause a severe reaction called anaphylaxis. Anaphylaxis may begin with some of the same symptoms as a less severe reaction, but then quickly worsen, leading someone to have trouble breathing, feel lightheaded, or to pass out. If it is not treated quickly, anaphylaxis can be life threatening.

Therefore, we politely request that you **DO NOT** send your child to school with any products containing nuts.

If you require any further information or have any questions, please do not hesitate to contact a member of staff.

Many thanks in advance for your cooperation,

A handwritten signature in blue ink, appearing to read 'A Kirk'.

Miss A Kirk  
School Leader
